EDUCATION

2022 - 2025

ENSA OUJDA

- Computer Science engineering.

2021 - 2022

EST OUJDA

- Business Intelligence Professional License.

2019 - 2021

EST OUJDA

- Technical university certificat in Computer applications developer.

2018 - 2019

HASSAN DAKHILE GUERCIF

- Bachelor's degree in mathematical sciences A.

CERTIFICATES

- C# for .NET Developers Certificate : Coursera.
- JavaScript Basics Certificate : Coursera.
- React Basics Certificate : Coursera.

LANGUAGES

- English (Fluent)
- French (Fluent)
- Arabic (Native)

EXTRACURRICULAR

- Member enactus EST oujda.
- Member metaverse EST oujda.
- Member Esteam EST Oujda.
- Secretary-General of the ENSA Oujda Computer Engineering Club.

LAOUAJ KAOUTAR

FULLSTACK .NET

UNIVERSITY PROJECTS

- Development of a donation website in BOOTSTRAP and PHP and MYSQL. 2023
- Development of a furniture e-commerce website in ReactJS, Laravel, Node.js, tailwindCSS and the Stripe API and MYSQL. 2024
- Development of an Android delivery application in Java, SQLite, XML. 2024
- Development of a modular platform dedicated to (P2E), facilitating the complete process of application, selection and incubation of projects, with advanced features such as a candidate passage calendar, in ReactJs and Spring Boot and POSTGRESQL. 2024

WORK EXPERIENCE

- Mixed reality & .net Development in SQLI Rabat** 2025
.NET & Unity Developer
 - I contributed to the development of immersive Mixed Reality applications using Unity and C#, including the Room Scanning feature, spatial mapping, and real-world environment interaction. I implemented scene understanding, object detection, and real-time user interaction features for Meta Quest devices, and I built and maintained application logic, optimized performance, and integrated backend services to ensure scalable and interactive XR solutions. I also participated in writing technical and functional documentation, preparing compliance licenses, Privacy Policy, Terms of Use, and in review sessions for the project. Throughout the development process, we followed Scrum methodology and used Jira, Linear, Microsoft Teams, Slack, and GitHub for project management, communication, and version control.
- SEOMANIAK, Oujda** 2024
.NET & Angular Intern
 - Creation of the Chafaf Entrepreneur platform: Chafaf Entrepreneur is a website allowing investors to invest in various projects that comply with Islamic criteria, proposed by entrepreneurs. More specifically, I developed the pages linked to the role of entrepreneur, which constitute an extension of the large Chafaf platform. The project uses **Angular** for the frontend and **.NET** for the backend, **MYSQL** for database management, applying the **Scrum** methodology, as well as teamwork

SKILLS AND KNOWLEDGE

- Front end web development : HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Angular, Tailwind CSS, Bootstrap.
- Backend web development : Java, PHP, C#, Spring boot, Java EE, Laravel, symfony, .Net, Unity, nodejs.
- Mobile development : Java (Android), Dart, Flutter, React Native.
- Databases : MySQL, MongoDB, SQLite, SQL, Oracle, PL/SQL, UML, Merise.
- Project management methodologies and tools : Scrum, Jira, teams, slack, linear.
- Design and models : Figma / Canva.
- Devops : Docker | Github | Git.
- Architectures & Concepts : Microservices, API REST, Sécurité (JWT), use of the meta quest 3 headset.
